TAMAYAKIN

## Metal Heat Treatment

**Japan Factory | Nadcap/JIS Q 9100　　China Factory | TS16949/ISO 9001**

Accredited Nadcap Heat Treating

### Constantly devoted to heat treatment for 70 years

We have grown up together with the Japanese economy exclusively devoted to the heat treatment, since the establishment in 1951. On the other hand, tried by various depression and disasters, we have cultivated our technical skill, human resource, and factories. Tamayakin Co. Ltd. keeps concentrated on heat treatment to construct the system to supply the better heat treatment service in any period. We hope that more and more heat-treated metals will support the machine industry,. and consequently our life. We Tamayakin keep the passion and sympathy to inheriting the technology, culture, and emotion with human relationships to create the future.

# Business Development of TAMAYAKIN

As the main businesses of us Tamayakin, the heat-treatment business for the customers in the Tama (Tokyo) area, the heat-treatment business satisfying the customers in Dalian area, and the aerospace business satisfying the quality requirement of the aerospace defense industry, endeavored by the whole company.

## Facility Development

### Management by AMS Specification

We are managing the heat-treatment furnace, and meters and peripherals according to the latest specification of AMS2750. Additionally, we are improving the meters repeating trial and error for the better measurement and control.

### Advanced Test Facility

Advanced testers conforming to the Nadcap standard are being introduced. Since we are manufacturing numerous kinds of products in small lots, we are performing product / material tests on various metals, sizes, shape, and requirements.

### Facilities are Selected in Global Scale

Sometimes global track record is required to the facilities by aircraft manufacturing industry, which is operating globally. We are installing overseas (US, Germany) machineries so that we can satisfy the requirement of the customers in the aircraft industry. The manufacturing environment is implemented also in China by installing the equipment manufactured by Japanese suppliers in China Factory.
